Custom PICTURE FRAMING

Mitre-Mite® A2M 200 Manual

The Mitre-Mite® A2M 200 Manual is our newest entry level frame assembly machine. It has a new light-weight design yet heavy duty mechanical components that have come to be known as the most robust V-Nailer in the industry!

ITW AMP's unique V-Nail® driver assembly system eliminates frequent blade changing and allows for years of trouble-free operation.

The new design allows for moulding sizes up to 7" wide and offers operator features such as a tilting base, front or rear set-up, and the new "positive placement" clamping feature.
